LEFT OVER FOOD RECIPE

A refreshing and tangy twist for your meal

Problem Statement

- Random leftover ingredients are often wasted
- Edible food gets thrown away
- Lack of recipe ideas
- Navigating complex dietary restrictions and food allergies, leading to unnecessary food waste, meal planning friction, and potential health risks.

Solution

SMART RECIPE GENERATOR

- Uses **Vision AI** to instantly scan **leftover ingredients**, filters them against **user-specific allergy** profiles
- Automatically suggests **safe, nutritionally balanced recipe alternatives** with smart ingredient substitutions.
- Provides **quick and simple recipes**
- **Nutrition chart**
- Save recipes

FEATURES

Input

- Ingredients Image scanner
- Recipe Category
- Cooking Time

Nutrition chart

- Calories
- Protein
- Carbohydrates
- Fat , Fiber
- Sugar

Allergens

- User can input the allergens
- Smart substitution for allergens

Why This is Special

- Dedicated short snippet explaining the specific flavor harmony of the combination.

TECHNOLOGY

Allergy & Nutrition Engine

- **Logic Core:** Python & Rule-based expert systems
- **Function:** Cross-references allergens with macro-nutrient substitution databases
- **Database:** USDA Food Data Central API

Backend & API Layer

- **Runtime:** Node.js, Express [FastAPI]
- **Database:** PostgreSQL & Redis (Caching recipe data)
- **Cloud:** AWS / GCP Serverless Functions

Approach

1. **Input Capture & User Profiling:**

- a. Users capture a photo of their leftover ingredients using camera.
- b. inputting their personal food preferences, and allergy profiles.

2. **Vision AI Recognition:**

- a. Computer vision models (OpenCV and YOLOv8) process the camera stream to instantly detect, segment, and tag all visible food items with high accuracy.

3. **Allergy Cross-Referencing:**

- a. Title & Description
- b. Precise Ingredient Breakdown
- c. Speciality description

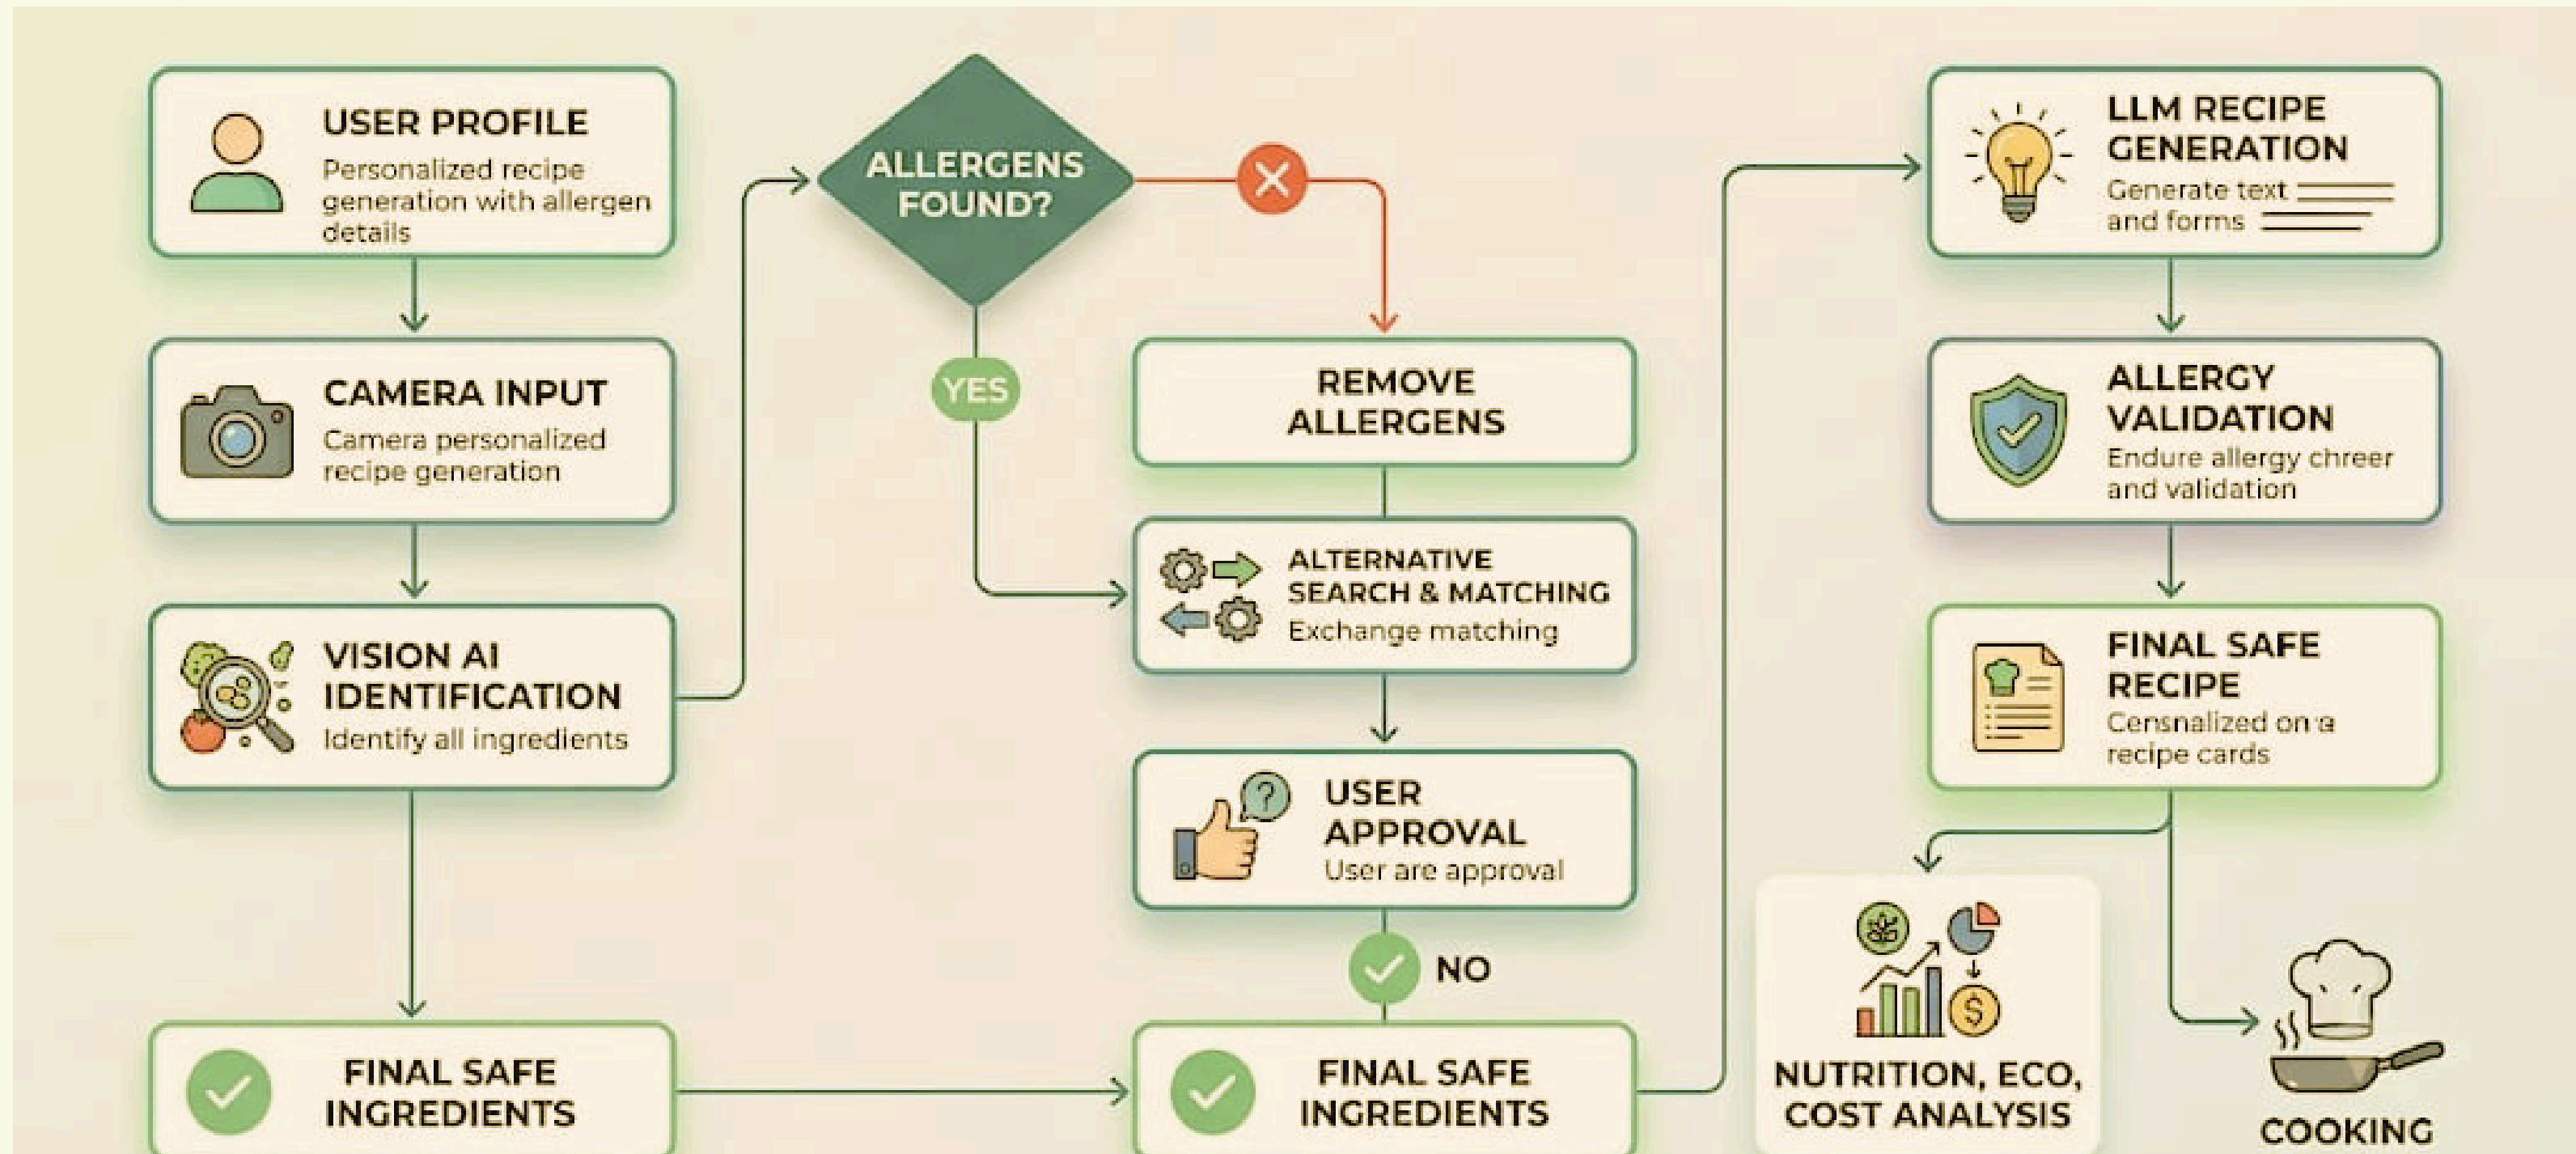

4. Nutritional Substitution Engine:

- a. Using **USDA nutritional databases**, the system **automatically replaces** restricted or missing **ingredients with safe**, macro-nutritionally balanced alternatives.

5. Recipe Generation & Output:

- a. The app compiles the verified ingredients into customized, step-by-step cooking instructions optimized to minimize household food waste.
